Customer Behavior & Revenue Analytics

A data-driven analysis to understand customer behavior, segment customers, measure retention, identify key revenue drivers, and find growth opportunities for a retail business.

Customer Segmentation

Identify high-value,
at-risk, and growth
customer segments.

Revenue Performance

Track sales, orders and
revenue trends across
products and regions.

Retention & Churn Analysis

Measure customer
retention and identify
churn risk early.

Customer Drivers & Deep Dive

Find product preferences,
return behavior and key
drivers of customer value.

Key Insights from the Analysis

1

Revenue & Customer Value

Monitor revenue, orders, AOV and revenue per customer to understand overall business performance. Use this view to quickly spot strong regions, periods and value trends.

2

High-Value Customer Concentration

A small group of high-value customers and strong segments typically drives a major share of revenue. Prioritize Champions and Loyal customers for retention, upsell and repeat purchase programs.

3

Retention Risk

Track new, returning, retained and churned customers to identify early warning signs of disengagement. Focus re-engagement efforts on at-risk customers before they become inactive.

4

Product Revenue Concentration

A few key product categories usually contribute the largest portion of revenue. Strengthen winning categories and improve weak-performing categories through targeted actions and assortment decisions.
